SUMMARY

Software Engineer with **5+ years** of experience architecting high-scale systems at **Careem** and **Airlift**. Experienced in building resilient systems. Early adopter of agentic engineering, leveraging AI to drive a **60%** increase in development velocity.

WORK EXPERIENCE

Software Engineer II — **Careem** — **Dec 2022–Present**
Careem Express Squad — Karachi, Pakistan — Hybrid

- Worked with **single-database multi-tenant architecture** supporting seamless logistics for **200+ B2B API partners**.
- Drove the end-to-end **decommissioning** of the Careem Express legacy B2B logistics infrastructure by orchestrating **Claude** and **Gemini** to safely plan, refactor and test distributed microservices.
- Accelerated system design and implementation by **60%** with AI assisted development using Claude Code and Cursor. Utilized advanced features like Sub-agents, Skills, Memory, Plan Mode and multi-repo indexing.
- **Onboarded 10+ high-valued merchants** by developing a Live Captain Tracking system using ThreadPoolExecutor.
- **Saved USD 1M** in annual revenue by implementing Dynamic Delivery Radius to optimize captain supply.
- **Enhanced engineering brand visibility** by leading the full-stack development of the Careem Blog.
- **Reduced MTTR for P0 complaints** by serving as the primary on-call engineer. Authored a blog on on-call tips.
- Mentored fresh engineers in the **Careem NextGen Program**. Delivered sessions on Redis and Swagger Codegen.

Tools and Technologies: Java, Spring Boot, Next.js, Docker, Kubernetes, Kafka, AWS, Claude, MySQL, Redis, Dynatrace

Associate Software Engineer — **Airlift Technologies** — **May 2021–Nov 2022**
Supply Chain Squad — Karachi, Pakistan — Hybrid

- **Reduced server load by 10%** by optimizing the inventory update API. Published a blog on API optimization.
- **Enhanced customer satisfaction** by architecting an ETA engine for real-time delivery estimates.

Tools and Technologies: TypeScript, NestJS, TypeORM, PostgreSQL, EBS, RDS, SQS, CloudWatch, Redis, Redlock, Jest

Software Engineer Intern — **Siliconplex** — **April 2021–May 2021**
Python Chapter — Karachi, Pakistan — On-site

- **Enhanced data discovery** for high-volume websites by co-developing a web crawler with Python and XML Sitemaps.

Tools and Technologies: Python, Django, SEO, Jenkins

EDUCATION

BS, Computer Science — **University of Karachi** — **Jan 2018-Dec 2021**
CGPA: 3.47 / 4.0 — Pakistan

- Developed “Let’s Ride”, a **console game** in C# implementing Object-Oriented Programming principles ↗
- Developed “Barbelator”, a real-time **barber shop simulation** program with Python and Google Colab ↗

Tools and Technologies: JavaScript, Python, C#, Assembly Language, Arduino, MySQL, XML, Google Colab

SKILLS

- Languages: Java, Python, JavaScript, C#
- Technologies: Docker, Kubernetes, PostgreSQL, Kafka, Spring Boot, Dynatrace, Redis, S3, Actions, Git
- Engineering: Software Design Patterns, Clean Architecture, Microservice Architecture, CI/CD, SOLID
